

Drawings have been nested to ensure a left and right hand method for metal and the small natural curving from cutting metal, assists overall fabrication alignment.

- Photos can be used to assembly.

Rental Agreement – Engineering Drawings & Leaflets

This Rental Agreement applies to all Dugong Scrapers engineering drawings, documents, and leaflets made available under free listing access and after purchase.

1. Identification & Marking Requirements

The Purchaser agrees that, upon manufacture, each part produced using the supplied drawings must be permanently marked with:

- The corresponding **invoice number**
- The **part number**
- The **date of manufacture**

These markings are required for **traceability**, including insurance, compliance, and tax record purposes.

2. Scope of Rental

Each **Rental** is strictly limited to:

- **One (1) Dugong Scraper assembly**, and/or
- **Parts for one (1) spare assembly only**

The Purchaser must not use a single **Rental** to manufacture multiple assemblies or multiple spare sets beyond this defined scope.

3. Activation & Time-Limited Access

All parts and associated files require an **activation code** prior to access.

- The applicable **rental period begins immediately upon activation**
 - Access to the files is **time-limited** in accordance with the agreed rental terms
 - Once the time period expires, access to the files will cease
-

4. General Condition

Use of any drawings, documents, or leaflets—whether accessed via free listing or after purchase—constitutes acceptance of this Rental Agreement.

Full Assembly Listings

Each full assembly rental includes 15 days of access from the time you activate. Opening the individual assembly files for the first time activates the countdown timer to expiry. During this rental period, the files may be viewed and used in accordance with the licence terms provided. Access to an assembly file set will automatically expire after 15 days. Individual parts contained within the assembly may have different rental timer periods, and access to those files will end once their individual timers expire. Purchases are refundable only if the file timer has not been activated on any part or assembly file purchased.
